Learning to draw means learning to “see” things differently, to observe our world from a different perspective. Once learned, drawing will let you tap into your creative right side of the brain and record what you see, either in reality or in your mind’s eye, in a way not unlike how we record our thoughts and ideas in words.

Learn how to access the non-verbal, creative side of the brain, the right brain! In only 2.5 days, students will be introduced to the five basic perceptual skills necessary for realistic drawing.

They are:

1. Perception of Edges
2. Perception of Space
3. Perception of Angles and Proportions
4. Perception of Lights and Shadows
5. Perception of the Whole (integration of the above skills)

Without the above skills, it is very difficult to draw from memory or from an imagined image, even for a trained artist. Anyone who wants to learn to draw, and who will try, can do so in a short period of time. Like all other skills, with practice, the skill can be perfected and you will be able to draw anything! The methods have been demonstrated and the results have been dramatic!

Our American instructor, Ms. Kristin Newton, is an artist and teacher, trained and certified by Dr. Betty Edwards, the author of the most widely used and highly praised drawing instruction book, *Drawing on the Right Side of the Brain*.

Kristin will engage the students in step-by-step demonstrations and fun and challenging exercises designed to access the right brain.

Date: Friday, Feb 28, 2014  
Saturday, Mar 1, 2014  
Sunday, Mar 2, 2014

Time: 5:00 pm-8:00 pm  
9:30 am-4:30 pm  
9:30 am-4:30 pm

Age: 10 years old & up

Fee: HK\$3,900/person  
HK\$3,700/person (for group of 2 or more)  
Fee includes supplies.

Venue: DD Centre, Room 2803B, 28/F., 148 Electric Road, North Point, (Fortress Hill MTR exit A)

To reserve space, please download and complete the Reply Slip and e-mail to: [pal@proactive-learning.com](mailto:pal@proactive-learning.com) or fax to 2735 9911. Please see the Reply Slip for payment instructions.
